RE: Licensee Name: Cape Ann Transportation Authority  
FRN: 0003620440  
Call Sign: WIG344

To Whom It May Concern:

The license referenced above Cape Ann Transportation Authority which is in the process of modifying listed frequencies that show on ULS as being past due on the construction deadline date.

As per Annette Ritchie at the FCC a Schedule K and waiver are not required on any license that reflects a build out deadline date that is prior to when the service went effective in ULS. According to Public Notice DA 03-647 (released March 7, 2003) the date which general business and industrial/land transportation (IG) licenses went into effect in ULS was June 5, 2001.

As WIG344 was granted prior to this date on September, 13, 1999 a Schedule K is not required. I was informed by Annette that if filing a modification on a license with a past due deadline date that is prior to the effective ULS date to simply include an attachment providing the FCC with the date of construction and the processor would enter it into ULS. This attachment was inadvertently omitted when the Form 601 was originally filed.

This letter is to certify that WIG344 was constructed and operational on October 13, 1999.

If additional information is needed please do not hesitate to contact Robert Ryan, at (978) 283-7916.

Sincerely,

Robert Ryan
